| Features             | <p>► For cooling tile drill bit under 18mm</p> <p>► Prolonger drilling speed</p> <p>Dip two seconds, cool for 4 seconds</p>                                                                                                                                                                                                                                               |                  |                         |            |  |  |
| Benefits             | <p>* Helps prevent overheating, maintaining consistent drilling performance throughout the job.</p> <p>* Extends the service life of drill bits by reducing heat-related wear.</p> <p>* Improves drilling precision by keeping the tool operating under optimal conditions.</p> <p>* Reduces replacement costs and downtime, increasing overall productivity on site.</p> |                  |                         |            |  |  |
